

# Current Progress

## Using Multiple Electromagnetic Indicators

for

### Earthquakes in California and Peru

Tom Bleier, Clark Dunson, Steve Roth:	QuakeFinder
Jorge Heraud, Antonio Lira:	PUCP Peru
Friedemann Freund, Robert Dahlgren:	SETI, NASA Ames
Ray Bamberg, Nevin Bryant:	NASA JPL/CIT
Dimitar Ouzounov	Chapman University

# “Grand Questions”

1. Are there Electromagnetic (EM) signals prior to earthquakes?
  - Need documented evidence using field instruments

# “Grand Questions”

1. Are there Electromagnetic (EM) signals prior to earthquakes?
  - Need documented evidence using field instruments
2. Is there a reasonable theory to explain them?
  - Physics-based theory of rock stress

# “Grand Questions”

- 1. Are there Electromagnetic (EM) signals prior to earthquakes?**
  - Need documented evidence using field instruments
- 2. Is there a reasonable theory to explain them?**
  - Physics-based theory of rock stress
- 3. Can we detect these unique EM signals?**
  - Threshold and range?

# “Grand Questions”

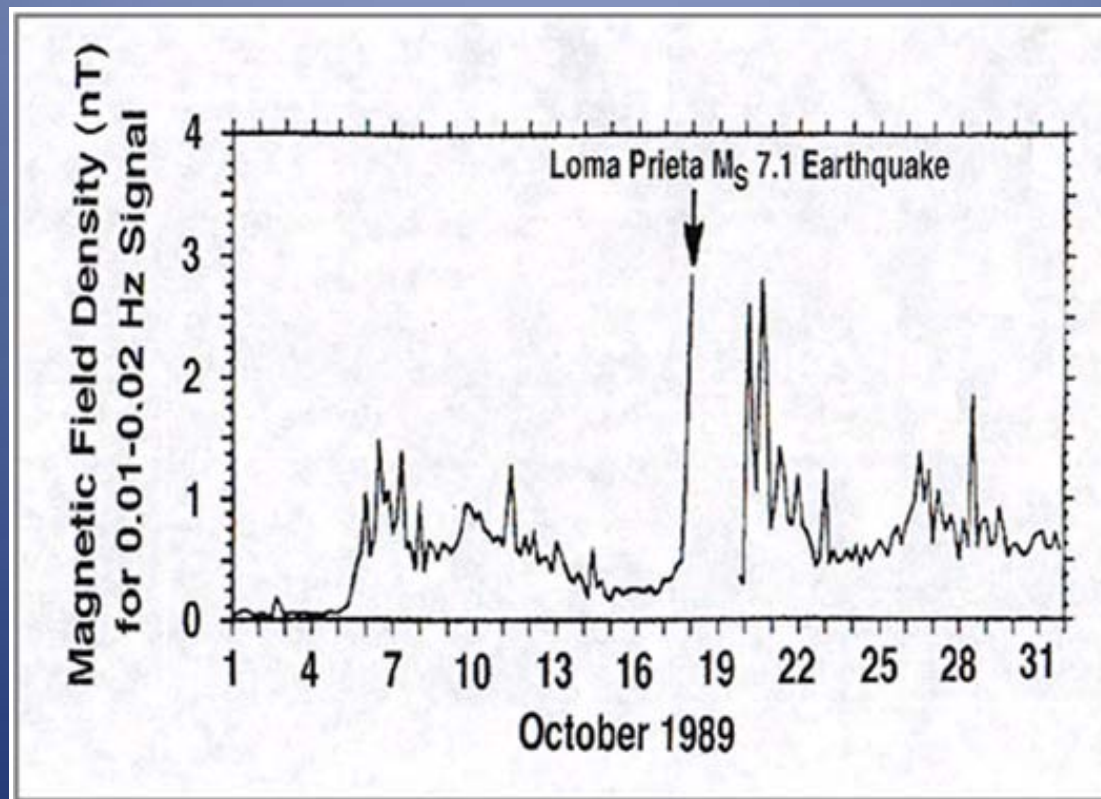

- 1. Are there Electromagnetic (EM) signals prior to earthquakes?**
  - Need documented evidence using field instruments
- 2. Is there a reasonable theory to explain them?**
  - Physics-based theory of rock stress
- 3. Can we detect these unique EM signals?**
  - Threshold and range?
- 4. Can we discriminate earthquake EM from noise?**
  - Lightning, vehicles, machinery, solar storms, etc.

# “Grand Questions”

- 1. Are there Electromagnetic (EM) signals prior to earthquakes?**
  - Need documented evidence using field instruments
- 2. Is there a reasonable theory to explain them?**
  - Physics-based theory of rock stress
- 3. Can we detect these unique EM signals?**
  - Threshold and range?
- 4. Can we discriminate earthquake EM from noise?**
  - Lightning, vehicles, machinery, solar storms, etc.
- 5. Can we make forecasts based on EM signals?**
  - Can they be made reliable?

# 1. Are there Electromagnetic (EM) signals prior to earthquakes? Ultra Low Frequency (ULF) Magnetic fields

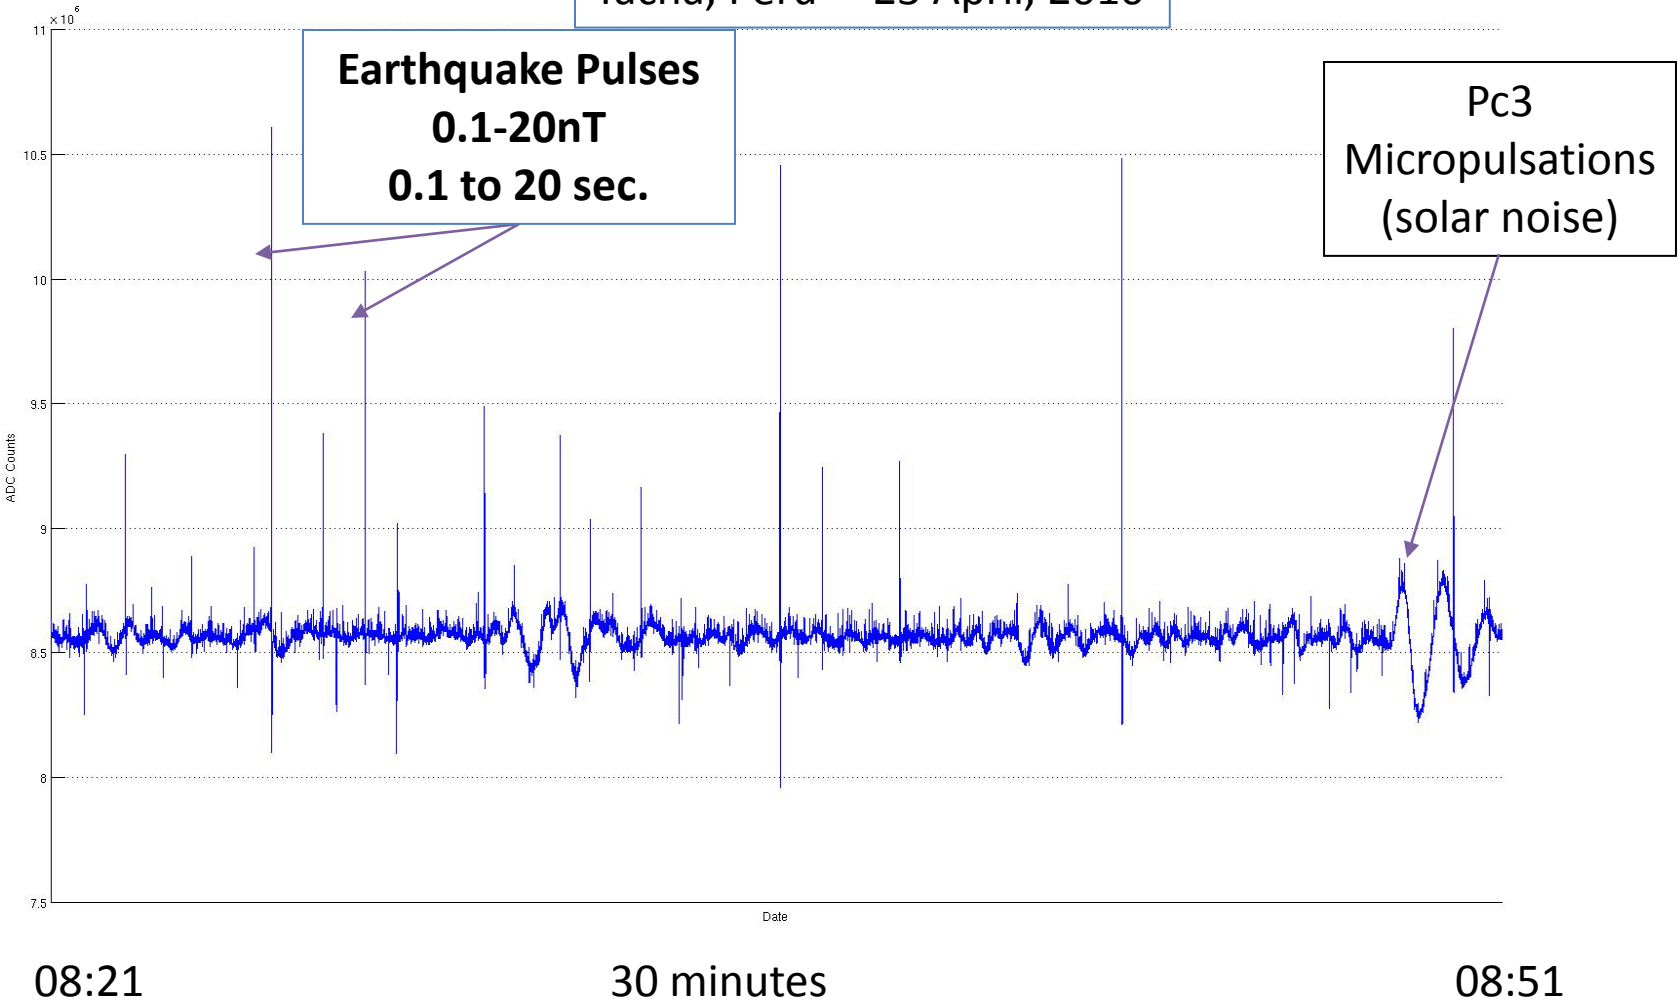

- Dr Tony Fraser-Smith (Stanford)
  - 1989 M7.1 Loma Prieta earthquake
  - 30 minute energy averages recorded\*
  - Only 1 site\*

\*Not sufficient

# Evidence from multiple earthquakes: “Uni-polar Magnetic Pulses”

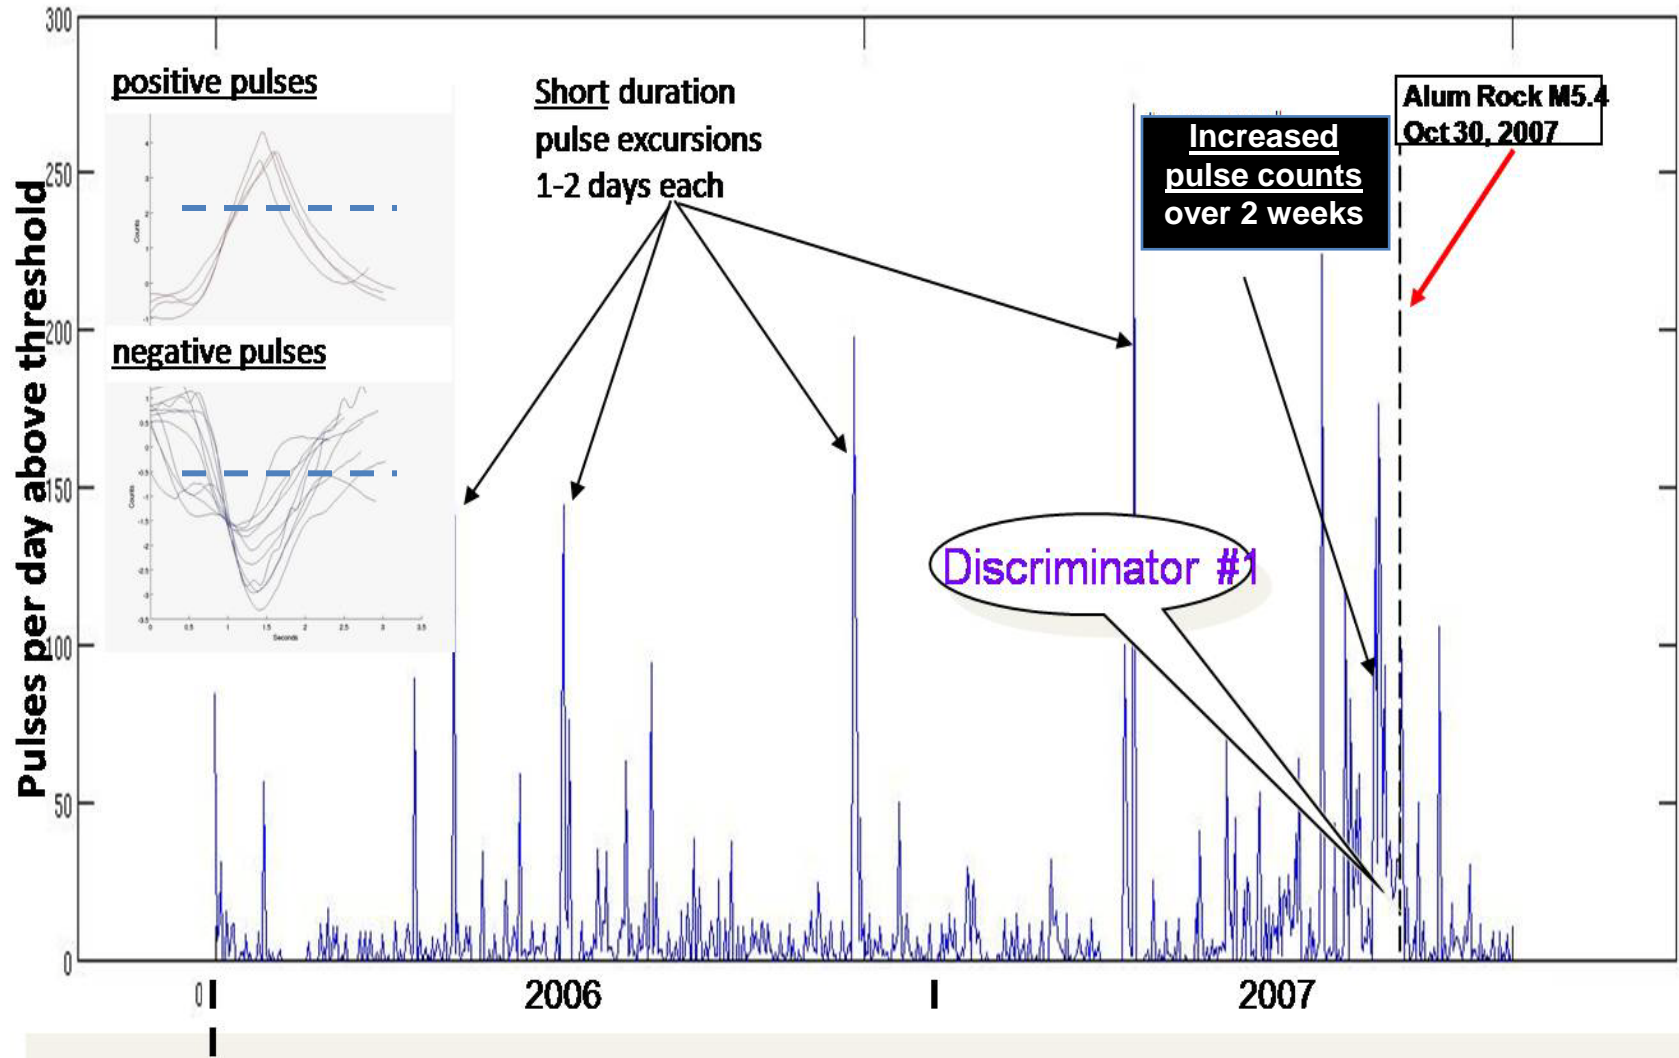

Tacna, Peru 23 April, 2010

# 1. Are there Electromagnetic (EM) signals prior to earthquakes? Ultra Low Frequency (ULF) Magnetic Fields (Alum Rock, Ca)

East-West Channel

# New: Pulse and Quake Activity: Tacna Apr. 1 to Nov 10

# New: El Carmen, Peru Pulse Count 2010

# 1. Are there Electromagnetic (EM) signals prior to earthquakes? “Earthquake Lights”

- Visible Light Signatures  
“Earthquake Lights”
- Minutes before/after earthquake

Figures 1 to 19 show earthquakes lights as published by Yasui (1968). All are from the Matsushiro, Japan area and are samples of the only known pictures of earthquake lights. They were taken by a Matsushiro dentist, Mr. T. Kuribayashi.

Pictures taken in Japan '70-'80's

# New: Earthquake Lights:

Lima Peru, 15 August, 2007 at 18:41:00 LT,

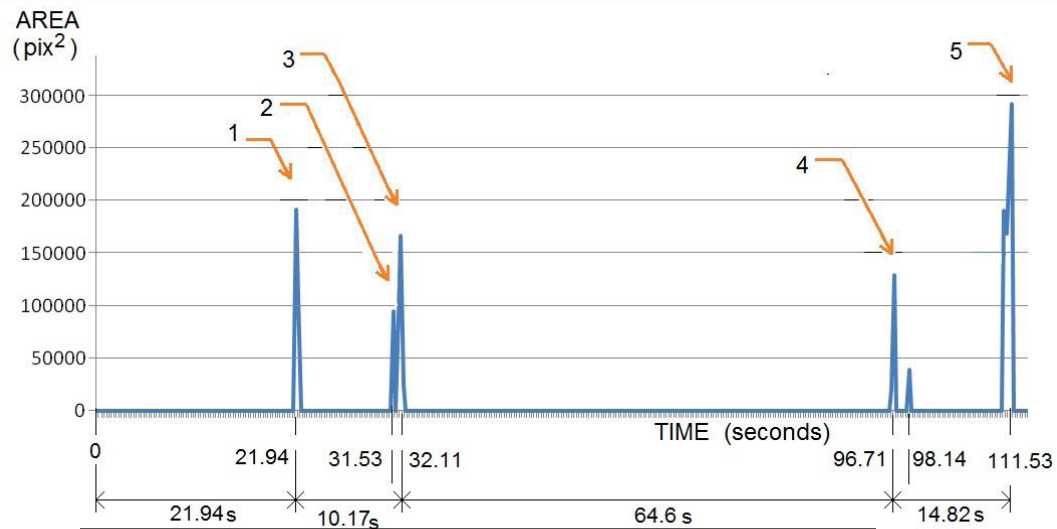

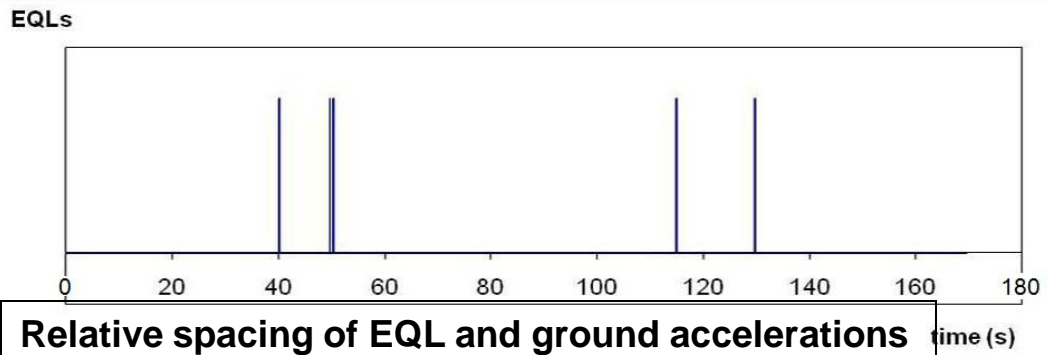

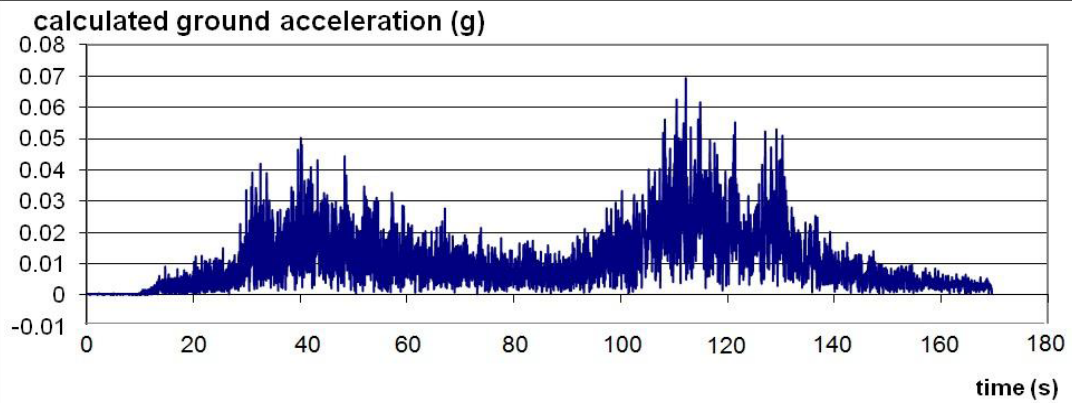

160 km north of the M8.0 epicenter  
Near time of P, S Wave arrival

Artist rendering  
from eye witness reports

Jorge Heraud, Antonio Lira: PUCP Peru

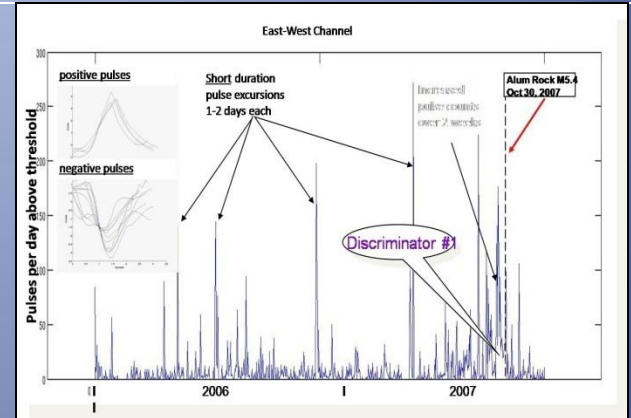

## 2. Is There a Reasonable Theory to Explain EM Signals?

Small Currents  
(small sample)

NASA (F. FREUND)  
Lab Experiments

Air Conductivity  
Sensor

ULF magnetometers

Hypothesis

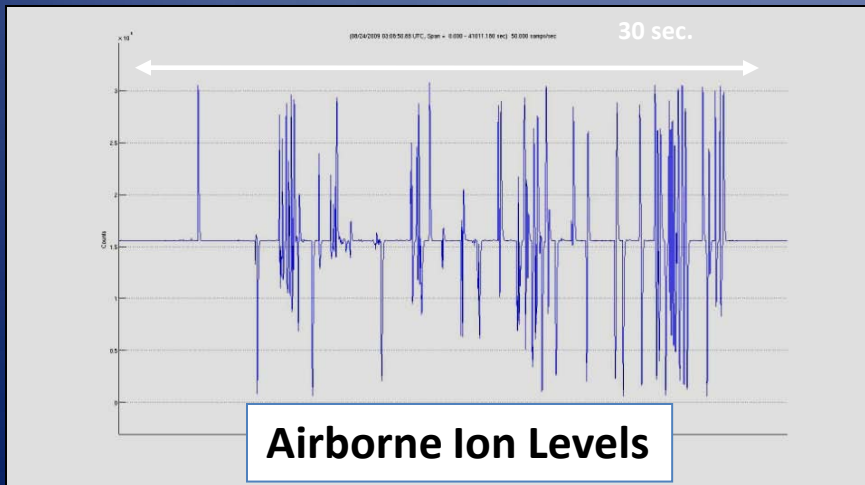

Defect Electron Migration  
P-Hole Carriers

# Pulse Comparison with Field Tests Aug, 2009 Bass Lake, Ca.
